**New build
Refurbishment
Fit out**

14th August 2008

To whom it may concern,

We wish to confirm that Matthew Stone Restoration Ltd. have carried out installation for our company at project St. Pancras International station in Central London.

The installations composed of cement based leveling / wearing screeds, fixing and polishing Terrazzo tiles. All works have been carried out in conjunction with Heritage Building.

The work was carried out between March 2007 and June 2008 and we found their workmanship to be of a high standard and the company generally was well organized and professionally managed. We would not hesitate to use them again and recommend their services to others.

Yours sincerely

Colin Munnelly
Project Manager for
ISG Plc.
